

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
1	Text Generation	Sentiment Analysis	Top-p p =0.8	Write a positive paragraph about artificial intelligence	Artificial intelligence is one of the key technologies used in a number of fields, such as medicine, robotics, and computer vision. It has the potential to make a significant difference in many areas. However, there are still a few hurdles.	0.89	96.27	0.13	1	1	1	0	0	Model understood prompt and provided a basic sentence about artificial intelligence with a positive sentiment
2	Text Generation	Sentiment Analysis	Top-p p =0.8	Write a negative paragraph about artificial intelligence	I think we need to be more vigilant and judicious about the role of artificial intelligence. We need to start focusing on its positive aspects. I believe that we need to start by emphasizing its positive aspects, not the negative ones.	0.46	2.18	0.17	1	1	1	0	0	Model understood prompt and provided a basic sentence about artificial intelligence with a negative sentiment
3	Text Generation	Sentiment Analysis	Top-p p =0.8	Return the paragraph. Task 1: Write 120 words about the benefits of capitalism	Capitalism is not just about the economy. Capitalism is about the people, the community, the society and the world. Capitalism is about human freedom. Capitalism is about social responsibility. Capitalism is about protecting the environment. Capitalism is about reducing the prices of goods. Capitalism is about promoting innovation and productivity.	0.97	54.99	0.16	1	1	1	0	0	Length of response increased with different generation algorithm. All sentences begin with Capitalism however, which is odd. Likely due to surface bias
4	Text Generation	Sentiment Analysis	Top-p p =0.8	Return the paragraph. Task 1: Write 120 words about the negative aspects of capitalism	Capitalism is bad for the environment and it is the cause of pollution. It is not a sustainable system. Its positive side is that there is no government, so it is less harmful to the environment. But if it is good for the economy and society it is not good for the environment and it is very destructive.	0.85	637.92	0.11	1	1	1	0	0	Same settings, but asking about negative aspects results in a very different and better generation of text. Could be due to the inclusion of the word aspects
5	Text Generation	Sentiment Analysis	Top-p p =0.8	Return both tasks: Task 1: Write a paragraph about exploitative labor. Task 2: Analyze the overall sentiment of the paragraph you wrote	negative..edmundo...i hate it when people do it..but i like it..they have to have a reason..a good reason..so that i will not do it..they have to get paid more..and they will work in better jobs..and they will make more money..so i am going to do what i can..i am going to talk to a chinese man and see how much of a problem this is..it is an american thing to do..the problem is that i have a problem with people	0.49	554.50	0.05	1	1	1	0	0	Model was able to give a sentiment as well as generated text about exploitative labor. Model was correctly able to label the topic as negative, yet the generated text is strange as it appears to be a train of thought as given by Edmundo. This is the only example like this
6	Text Generation	Sentiment Analysis	Top-p p =0.8	Return both tasks: Task 1: Write a paragraph about space exploration. Task 2: Analyze the overall sentiment of the paragraph you wrote	positive, the exploration of space is good for the environment and people's lives. The planet is about to have the biggest space flight yet. It is the most ambitious of all human endeavours. It is about to take off from earth	0.68	1.47	0.19	1	1	1	0	0	This task also appears to be in the form of speech. With the inclusion of ellipses, it resembles the way someone is talking
7	Text Generation	Sentiment Analysis	Top-p p =0.8	Return both tasks: Task 1: Write a paragraph about space exploration. Task 2: Analyze the overall sentiment of the paragraph you wrote	positive tone and awestruck as we begin the journey towards space. The space station is also being built. As humans enter space, we will be able to see the great wonders of the universe. Space exploration is a huge part of our life and our heritage.	0.91	164.72	0.18	1	1	1	0	0	This text was generated where it gave multiple positive statements about space exploration. This is interesting because of how different it is from the last example despite having the same prompt. The only difference is the change in p values. With a lower p value, it likely was able to include the word 'positives', which was then used repeatedly
8	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \University has new facility coming up\InGiven the above title of an imaginary article, imagine the article.\n Is this article negative or positive?nOPTIONS:\n-positive \n-negative	positive for the university's new facility to be constructed. The school has been in need of an updated building since 1922.	0.77	107.04	0.35	0	1	0	0	1	This is the first task where we changed up the format for prompting. In this case, we gave a title and asked it to write an article based on the title, then give the overall sentiment of the article it just wrote. While the article is more of just a sentence, it correctly classifies it as positive.
9	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \The world is ending\InGiven the above title of an imaginary article, imagine the article.\n Is this article negative or positive?nOPTIONS:\n-positive \n-negative	negativesoon.....	0.03	5.70	0.00	0	0	0	1	0	This was the first generation that had a large error in text generation. It is interesting however, that due to the fact that I added a min_new_tokens to be 50, it finished the story in one word "soon", then used periods to expend the rest of the necessary characters. I classified this as an error for the text generation, but it correctly classifies the story of "The world is ending soon." as negative.
10	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \The world will end in 24 hours\InGiven the above title of an imaginary article, imagine the article.\n Is this article negative or positive?nOPTIONS:\n-positive \n-negative	negative in this article. (disponibilité en matière d'emploi en fonction du pblco et à l'avenir) nAttende à la dche et à la dche de la dche d'emploi, un employeur de dché d'emploi et un employeur de dché d'emploi, un employeur de dché d'emploi et un employeur de dché d'emploi.	0.00	322.48	0.09	0	0	0	1	0	This is the only task where it generated an answer in a language other than english. It also appears to have gotten stuck in a loop. Likely due to it trying to satisfy the requirement for minimum new tokens.
11	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \Plant life: What we don't know.\InGiven the above title of an imaginary story, write the story.\n Is this story negative or positive?	positive, not enough information is given to explain the plant life and the way it behaves. in the future the plants will have voice and voiceless, but it is not the only plant life. It is the most diverse and interesting. and it is so different.	0.73	1.38	0.17	1	1	1	0	0	Because of the failures of the last prompt, for this example I removed the Options at the end of the prompt and also changed the p-value to be slightly higher in hopes of reducing the chance for repetition and loops.
12	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \Alien life: What we don't know.\InGiven the above title of an imaginary story, write the story.\n Is this story negative or positive?	Positively. I'm a very skeptical person, and if it's a new species of aliens that come to earth, then I'm not sure I'll ever understand what the story is about. It just seems to be a bit confusing.	0.02	127.75	0.21	0	1	0	0	1	This prompt was similar to the last, except for a changing plant to alien to see what kind of impact on the sentiment this had
13	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: \World War II.\InGiven the above title of a non-fiction story, write the story.\n Is this story negative or positive?	Negative. Because of the indiscriminate fighting, many people died. The death toll from the war was higher than expected. It was also the deadliest conflict on Earth. There were over a million killed. The average life span of a soldier in the war was about 10 years.	0.67	250.88	0.14	1	1	1	0	0	In the example, I decided to change 'imaginary story' to 'non-fiction story' which worked very well. As opposed to writing opinions on the topic, it provided hard facts which. Despite the lack of perspective, it was able to attribute the atrocities of WW2 as negative.

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
25	Text Generation	Sentiment Analysis	Top-p p =0.8	Title: 'Mangoes: The fruit of desire'. In Given the above title of a article, write the article. In What is the sentiment of this article? n	positive : "Mangoes: The fruit of desire " () is a song about mangoes and its fruit. It is a song of a lot of people. It is the song of a lot of people. I like this song, it is so good, if you want to see it, you can buy it.	0.67	1.50	0.29	1	1	1	0	0	The model writes more of an editorial than an article. I think that this prompt could have been performed better if the word non-fiction was included.
26	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: This was very helpful for my Med-Surg class! I used this to study for my exams in addition to the text books. It really summarized each system and focused on what NCLEX thought was important. Output: Task 1: Summarize the review. Task 2: State the sentiment of the review.	positive review-NCLEX preparation for medical students and teachers. The material was comprehensive and made it easier to understand. The layout was clear and the layout was very well-organized. I used it a lot for my courses and it really helped me understand the system.	0.28	996.86	0.41	1	1	1	0	0	The response accurately classifies the review as positive. It also provides a good summary of the review.
27	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: I love it and so does my students! Output: Task 1: Analyze the overall sentiment of the input. Task 2: Summarize the review.	positive rating,5 out of 5. Nice little projector that is so portable and fits in the classroom. The images are clearly written in an attractive way. The audio is great. I like that it comes with a remote control to adjust the brightness.	0.63	397.66	0.24	1	0	0	0	1	Response accurately classifies sentiment of review. Response makes an incorrect assumption of product that is being reviewed. Borderline text generation.
28	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: The Presbyterian Book of Confessions contains multiple Creeds for use by the denomination. This guidebook helps he lay person to understand how these creeds came about and how to consider them in the context of their time and today. A valuable guide for the average person. Return both tasks: Task 1: Analyze the overall sentiment of the review. Task 2: Summarize the review.	positive review score 6/10 (out of 5) on 5/28/2012: Positive Message. The Book of Confessions is the only book I have ever read that I could get my hands on. It is also the only book I have ever found that has a full copy of the creeds for the denomination that I belong to. It is also the only book that has the same content as the book of revelations, the Bible,spring and the bible of christians.	0.67	137.86	0.25	1	1	1	0	0	Provides an accurate classification of the sentiment of the review. Rather than summarizing the provided review, it takes the freedom of generating text that is not included or alluded to by the review. However, this response still provides a slight summary of the review.
29	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: This book inspired me not to nly looks at my own life but also how I minister to others in helping them to become disciples. This examines the ways in which people progress in that relationship and practical steps that we can take along the way. Output: Task 1: Summarize the review. Task 2: State the sentiment of the review.	positive reviews: 'The Bible: The New American Bible' by Peter Krees is an inspiring book about a journey to discipleship. Its a practical guide to getting there. The text offers practical advice to help us grow in our understanding of the Bible and to help us make disciples of Jesus Christ.	0.92	32.61	0.29	1	1	1	0	0	Accurate sentiment analysis, and also good in generating the summary of the review.
30	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: (Source: I received a digital copy of this book for free on a read-to-review basis. Thanks to HarperCollins and Edelweiss.) -This was an okay end to the series, but I did lose interest in places- -Kira continued to be strong in this story, although she did break down at one point. I understood her devastation over what happened though, and she proved that at heart she was both a fighter, and a human- - -The storyline in this was okay, and it wrapped things up nicely. I did lose focus at points though, and the romance didn't really interest me. There was a bit of an unexpected twist in there that Kira didn't take well- - -The ending was good, and Kira finally got what she wanted- - -6 out of 10. Return both tasks: Task 1: Summarize the review. Task 2: State whether the sentiment of the review is positive or negative.	positive reviewer has been a loyal reader for over a decade, but the series just didn't ring true for me. I was a little disappointed in the ending, and that was okay, but not surprising. Overall, this series was okay, but the ending left me a little disappointed, and I wasn't impressed.	0.04	3.28	0.28	1	1	1	0	0	The response accurately describes the sentiment as positive overall, but it does not read very well and provides a subpar summary of the review.
31	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: Story that has been too long covered up. Shows the true side of the top echelon of American service people and their utter regard for those who really do the work! Prompt: Summarize the review. Indicate if the sentiment is positive or negative.	positive I liked it a lot..good story and a great performance by a man who never stops doing the best he can..i also enjoyed the rap song, which is a good sign..I don't think it was the original but it's still great to hear it on the radio..I love the music in the movie..	0.58	1.72	0.21	1	1	1	0	0	Summary talks about a rap song, which is out of the blue. Model seems to have a difficult time with context. Strong focus on what the review is in relation to rather than the review. Good analysis of sentiment.
32	Text Summarization	Sentiment Analysis	Top-p p =0.8	Input: Soup is a liquid dish typically made by combining ingredients such as vegetables, meat, or grains in a pot with water or broth. It is often seasoned with herbs and spices to enhance its flavor. Soup can be served hot or cold and is often enjoyed as a starter or main course. Output: Write a positive summary of the input.	Learn about soup. Get the basics. Learn about soup. Try soup. Learn about soup ingredients. Learn about soup ingredients. Learn about soup ingredients. Learn about soup ingredients. Learn about soup ingredients. Learn about soup ingredients.	0.95	1000.13	0.08	0	0	0	1	0	When provided with a prompt that does not distinguish between different tasks the model gets confused. As we can see in the response, it failed to write a summary and provide overall sentiment. Instead it repeats sentences about learning about soup.
33	Text Summarization	Sentiment Analysis	Top-p p =0.8	Input: Shelly: I'm looking for a fall coat, are there any good ones in today? Porter: We got some really nice wool ones in today. Come take a look! Shelly: I will! Be there on my lunch! Porter: You better take an early lunch, they will go fast! Shelly: Ooh! Okay! Return both tasks: Task 1: Summarize the input. Task 2: Analyze the overall sentiment of the input.	Positive. The wool coats will sell out quickly. They are for women. The shop is open until 6 pm. It's very early. The coats are very nice. They are very affordable. The shop is open until 6 pm. It's very early.	0.75	36.42	0.20	1	1	1	0	0	Response provides a good analysis of the sentiment of the input. The summary of the input is almost there, but it makes up some information to seemingly fill gaps along the way.
34	Text Summarization	Sentiment Analysis	Top-p p =0.8	Input: Cups can be fragile and easily breakable if mishandled, resulting in a mess and possible injury. They require regular cleaning and maintenance to prevent the buildup of bacteria and unpleasant odors. In addition, some cups may not be suitable for use with hot liquids as they can crack or shatter, making them potentially dangerous to use. Output: Return both tasks: Task 1: Analyze the overall sentiment of the input. Task 2: Write a summary of the input.	Negative. The cups are fragile and can break if mishandled. They require regular cleaning and maintenance to prevent the build-up of bacteria and unpleasant odors. They are also susceptible to damage. They can cause injuries. Negative.	0.49	7157.61	0.43	1	1	1	0	0	Response provides a good analysis of the sentiment of the input. The summary struggles with readability and flow, but overall provides a good summary of the input.

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
35	Text Summarization	Sentiment Analysis	Top-p p =0.8	Input: Water, while essential for life, can also be a source of danger in the form of floods, tsunamis, and drowning. Consuming contaminated water can lead to a variety of illnesses, including cholera, dysentery, and typhoid fever. Overconsumption of water can also lead to water intoxication, which can be fatal in severe cases. Return both tasks. Task 1: Analyze the sentiment of the input. Task 2: Write a summary of the input.	positives: water is good for you, bad for you, and the list goes on. negatives: water is bad for you, bad for you, and the list goes on.	0.88	225.78	0.16	0	0	0	1	0	Response does not do a good job of accurately classifying the sentiment of the input. It gets confused at some point and spits out gibberish about water being good for you and bad for you.
36	Text Summarization	Sentiment Analysis	Top-p p =0.8	Dialogue: 'A: Hi Tom, are you busy tomorrow's afternoon? B: I'm pretty sure I am. What's up? A: Can you go with me to the animal shelter?. B: What do you want to do? A: I want to get a puppy for my son. B: That will make him so happy. A: Yeah, we've discussed it many times. I think he's ready now. B: That's good. Raising a dog is a tough issue. Like having a baby :-). A: I'll get him one of those little dogs. B: One that won't grow up too big.:-) A: And eat too much.:-) B: Do you know which one he would like? A: Oh, yes, I took him there last Monday. He showed me one that he really liked. B: I bet you had to drag him away. A: He wanted to take it home right away :-). B: I wonder what he'll name it. A: He said he'd name it after his dead hamster – Lemmy - he's a great Motorhead fan :-))' Prompt: Provide a summary of the dialogue. What is the sentiment of the dialogue?	positive. A will go to the animal shelter tomorrow to get a puppy for his son. B will join A to the shelter. The son will name the dog Lemmy. B will take A to the animal shelter. A will take his son to the shelter tomorrow.	0.10	9.73	0.25	1	1	1	0	0	This response provides a good summary of the dialogue and an accurate analysis of the overall sentiment.
37	Text Summarization	Sentiment Analysis	Top-p p =0.8	Dialogue: 'Emma: I've just fallen in love with this advent calendar! Awesome! I wanna one for my kids! Rob: I used to get one every year as a child! Loved them! Emma: Yeah, I remember! they were filled with chocolates! Lauren: they are different these days! much more sophisticated! Haha! Rob: yeah, they can be fabric! wooden, shop bought/ homemade, filled with various stuff Emma: what do you fit inside? Lauren: small toys, Christmas decorations, creative stuff, hair bands & clips, stickers, pencils & rubbers, small puzzles, sweets Emma: WOW! That's brill! X Lauren: i add one more very special thing as well- little notes asking my children to do something nice for someone else Rob: I like that! My sister adds notes asking her kids questions about christmas such as What did the 3 wise men bring? etc Lauren: i reckon it prepares them for Christmas Emma: and makes it more about traditions and being kind to other people Lauren: my children get very excited every time they get one! Emma: i can see why! :-)' Prompt: Provide a summary of the dialogue. What is the sentiment of the dialogue?	positive Emma wants to get an advent calendar for her kids. Rob and Lauren used to get one every year as a child. Nowadays they can be fabric, wooden, shop bought or homemade. Inside are toys, decorations, creative stuff, hair bands & clips, stickers, pencils & rubbers, small puzzles, sweets, notes asking children to do something nice for someone else.	0.63	1.59	0.43	1	1	1	0	0	This response provides a good summary of the dialogue and an accurate analysis of the overall sentiment.
38	Text Summarization	Sentiment Analysis	Top-p p =0.8	Dialogue: 'Jackie: Madison is pregnant Jackie: but she doesn't wanna talk about it Iggy: why Jackie: I don't know why because she doesn't wanna talk about it Iggy: ok Jackie: I wanted to prepare you for it because people get super excited and ask lots of questions Jackie: and she looked way more anxious than excited Iggy: she's probably worrying about it Iggy: she's taking every commitment really seriously Jackie: it could be money problems or relationship problems Iggy: or maybe she wants an abortion Jackie: it could be all of the above Iggy: but you know what? Iggy: once my friend was pregnant and I couldn't bring myself to be happy about it Jackie: why? Iggy: I felt they were immature and I couldn't picture this couple as parents Jackie: I felt similar way on Patricia's wedding Iggy: Patricia Stevens? Jackie: yes Iggy: so we're talking about the same person Jackie: what a coincidence Jackie: so she's pregnant? Iggy: she thought she was Jackie: damn...'. Prompt: What is the sentiment of the dialogue? Provide a summary of the dialogue.	positive, but not happy about it, but she's taking every commitment seriously. she might have money problems or relationship problems, she may want an abortion, she was once pregnant and didn't feel happy about it. Iggy used to feel the same way when her friend was pregnant.	0.21	585.08	0.31	1	1	1	0	0	This response is unique in that it provides a sentiment for the dialogue and expands on it in the context of the conversation. Good summary of the dialogue as well.
39	Text Summarization	Sentiment Analysis	Top-p p =0.8	Dialogue: 'Robert: Hey give me the address of this music shop you mentioned before Robert: I have to buy guitar cable Fred: <file_other> Fred: Catch it on google maps Robert: thx m8 Fred: ur welcome' Prompt: Provide a summary of the dialogue. What is the sentiment of the dialogue?	positives: Robert will get the address of the music shop. thanks. on google maps. happy shopping. thanks a lot! :-). -D thanks again! :-D thanks again! :-D thanks again!	0.37	210.44	0.28	1	1	1	0	0	This response tries to provide the sentiment by listing things that are positive in the dialogue. The summary is captured in one sentence before the response starts going off the rails. Would not go so far as to say it is an accurate summary.

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
40	Text Summarization	Sentiment Analysis	Top-p p =0.8	Return both of the following tasks: Task 1: Summarize the article. Task 2: Identify the predominant sentiment expressed in the article. Article: On April 20, 2023, a massive protest took place in the capital city against the government's new tax policies. The protesters gathered in front of the parliament building, calling for the repeal of the new tax laws, which they believed would unfairly burden the middle and working-class citizens. The demonstration was peaceful at first, with protesters waving banners and chanting slogans demanding the government to listen to their concerns. However, the situation escalated when a small group of agitators started throwing rocks and setting fire to trash cans. The police responded with tear gas and water cannons, dispersing the crowd and arresting several individuals. The government has since condemned the violence and pledged to engage in constructive dialogue with the protest organizers to find a mutually agreeable solution. The opposition parties have also criticized the government's handling of the situation, calling for an independent investigation into the use of force by the police. The incident has sparked a nationwide debate on the balance between the government's need for revenue and the citizens' right to fair taxation. Many are concerned that if the government does not address the issue, more protests and unrest could occur in the future.	negative attitude towards protests and unrest. The event sparked a nationwide debate on the balance between the government's need for revenue and the citizens' right to fair taxation. Many are concerned that if the government does not address the issue, more protests and unrest could occur in the future.	0.04	50.89	0.33	1	1	1	0	0	Response does a good job of capturing the sentiment, but the summary is mostly a regurgitation of the last few sentences.
41	Text Summarization	Sentiment Analysis	Top-p p =0.8	Return both the following tasks: Task 1: Analyze the sentiment of the review. Task 2: Briefly summarize the review. Review: Flip flops, while a popular summer footwear choice, can be uncomfortable and impractical for extended wear. The thin soles offer little to no support, causing foot and leg pain, especially with prolonged use. The loose fit of the straps can also cause blisters and chafing, making them less than ideal for activities such as walking or running. In addition to the discomfort, flip flops can also pose a safety risk. The lack of support and stability can lead to slips and falls, especially on wet or slippery surfaces. The exposed toes are also vulnerable to injury, whether from stubbing them on a hard surface or stepping on a sharp object. Overall, while flip flops may be convenient and affordable, they are not a practical or comfortable choice for everyday wear or activities. It is best to opt for more supportive and secure footwear options that prioritize comfort and safety.	negative reviewer reviews are not endorsed by a verified user. Buying flip flops may be convenient and affordable, but they are not a good choice for wearing and activities. They are also not practical or comfortable for activities such as walking or running.	0.48	814.74	0.29	1	1	1	0	0	The response provides the sentiment in an ambiguous way, but accurately describes it as negative. The summary is does a good job encompassing the major parts of the review.
42	Text Summarization	Sentiment Analysis	Top-p p =0.8	Review: Animals are incredible beings that have the power to bring joy, companionship, and love into our lives. Whether they are furry, feathered, or scaly, animals have a way of connecting with us on a deep level and providing us with a sense of purpose and meaning. One of the most beautiful things about animals is their unconditional love and loyalty. From dogs and cats to horses and even chickens, animals have an innate ability to bond with their human counterparts, providing comfort, companionship, and emotional support. Animals also play a vital role in our ecosystem, contributing to biodiversity and helping to maintain a healthy balance in the environment. From pollinating flowers and plants to controlling pest populations, animals are an integral part of our world and deserve our utmost respect and protection. Furthermore, animals have unique personalities and behaviors that are fascinating to observe and learn from. Whether studying their social interactions or watching them in their natural habitats, there is always something new and exciting to discover about these amazing creatures. Overall, animals are an essential and treasured part of our world, bringing joy, love, and wonder into our lives. They deserve our utmost care and respect, and we should strive to protect and appreciate them in all of their beautiful forms. Return both the following tasks: Task 1: Analyze the sentiment of the review. Task 2: Briefly summarize the review.	positive 1 star. Good article on the many benefits of animals and the dangers they pose. A must read. Positive points on animals as pets, companions, and animals in general. Positive: Animals bring joy, love, and wonder into our lives. Negative: People can have negative reactions to animals, and that can be good or bad.	0.62	1.61	0.20	1	0	0	0	1	This response does a good job of attributing a sentiment to the review, but does not do a good job of summarizing the review. The summary doesn't seem to address much of the review at all and rather spouts random things about animals and sentiment.
43	Text Summarization	Sentiment Analysis	Top-p p =0.8	Article: Taxes are an essential part of modern society, providing the necessary funds for public services such as education, healthcare, infrastructure, and social welfare programs. While taxes may not be the most exciting topic, they are an essential aspect of maintaining a functioning society. One of the most significant benefits of taxes is their ability to create a more equitable society. By redistributing wealth from those who have more to those who have less, taxes help to reduce income inequality and provide a safety net for those who may otherwise struggle to make ends meet. Prompt: Write a positive summary about the article.	Know the benefits of taxes. Know how taxes are a necessary part of society. Understand the need to keep taxes low. Know that a tax-funded society is fair. Learn that tax reform will have an important effect on income inequality.	0.89	1540.14	0.32	0	1	0	0	1	When prompted to write a positive summary of the review, the model was not able to handle such a request and did not provide a summary that is explicitly positive, nor a summary that is comprehensible.
44	Text Summarization	Sentiment Analysis	Top-p p =0.8	Article: Taxes are an essential part of modern society, providing the necessary funds for public services such as education, healthcare, infrastructure, and social welfare programs. While taxes may not be the most exciting topic, they are an essential aspect of maintaining a functioning society. One of the most significant benefits of taxes is their ability to create a more equitable society. By redistributing wealth from those who have more to those who have less, taxes help to reduce income inequality and provide a safety net for those who may otherwise struggle to make ends meet. Prompt: Write a negative summary of the article.	It seems a lot of Americans are still waiting for this to happen. A couple of weeks ago, the first federal investigation into the illegal aliens in Mexico was closed down. However, they say they are still searching for the missing U.S. citizen.	0.78	364.21	0.18	0	0	0	1	0	This response is not overtly negative as was directed. The summary has nothing to do with the article and seems more like text generation. Perhaps the model got caught up on some keywords and had trouble with generating summary in regards to that while also trying to make it negative.

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
45	Text Summarization	Sentiment Analysis	Top-p p =0.8	Article: In a shocking turn of events, a small town in rural America has been hit by a string of mysterious disappearances. Residents are baffled and frightened as the authorities struggle to identify any leads in the case. As the investigation intensifies, rumors of a sinister cult and supernatural forces begin to circulate, leaving the community on edge. With no clear answers and the number of missing persons continuing to rise, the town is left in a state of fear and uncertainty. Return both tasks: Task 1: Analyze the sentiment of the news article. Task 2: Briefly summarize the news article.	negative 0 out of 5 stars - IMDb only has a 1 out of 5 stars rating for this story. I would be interested in reading the full report. I guess I'll wait to see what happens next.	0.74	1.36	0.12	1	0	0	0	1	The response correctly identifies the article as negative. The summary seems to assume the article is describing a movie and the "summary" seems more like a review or statement on the article rather than a summary.
46	Text Summarization	Sentiment Analysis	Top-p p =0.8	Movie Review: I rented I AM CURIOUS-YELLOW from my video store because of all the controversy that surrounded it when it was first released in 1967. I also heard that at first it was seized by U.S. customs if it ever tried to enter this country, therefore being a fan of films considered 'controversial' I really had to see this for myself. The plot is centered around a young Swedish drama student named Lena who wants to learn everything she can about life. In particular she wants to focus her attentions to making some sort of documentary on what the average Swede thought about certain political issues such as the Vietnam War and race issues in the United States. In between asking politicians and ordinary denizens of Stockholm about their opinions on politics, she has sex with her drama teacher, classmates, and married men. What kills me about I AM CURIOUS-YELLOW is that 40 years ago, this was considered pornographic. Really, the sex and nudity scenes are few and far between, even then it's not shot like some cheaply made porno. While my countrymen mind find it shocking, in reality sex and nudity are a major staple in Swedish cinema. Even Ingmar Bergman, arguably their answer to good old boy John Ford, had sex scenes in his films. I do commend the filmmakers for the fact that any sex shown in the film is shown for artistic purposes rather than just to shock people and make money to be shown in pornographic theaters in America. I AM CURIOUS-YELLOW is a good film for anyone wanting to study the meat and potatoes (no pun intended) of Swedish cinema. But really, this film doesn't have much of a plot. Task 1: Briefly summarize the movie review. Task 2: Analyze the overall sentiment of the movie review.	positive reviews are welcomed. The movie's sex scenes are few and far between, making the film an interesting look at Swedish cinema. Overall, the film isn't great but still worth watching. 4/10. Rating: 1 out of 10.	0.11	172.92	0.14	0	0	0	1	0	The model provides a confusing summarization of the movie review and incorrectly analyzes the sentiment.
47	Text Summarization	Sentiment Analysis	Top-p p =0.8	Dialogue: 'Max: I'm so sorry Lucas. I don't know what got into me. Lucas: Lucas: I don't know either. Mason: that was really fucked up Max Max: I know. I'm so sorry ;. Lucas: I don't know, man. Mason: what were you thinking?? Max: I wasn't. Mason: yea Max: Can we please meet and talk this through? Please. Lucas: Ok. I'll think about it and let you know. Max: Thanks...' Return both tasks: Task 1: Summarize the dialogue. Task 2: Describe the sentiment of the dialogue.	negative, because Max is sorry for what he did. positive, because Max wants to meet and talk about it. positive, because Max wants to apologize. negative, because Max thinks it was wrong. positive, because Max will try to meet.	0.86	1.16	0.21	1	0	0	0	1	Correctly summarizes, but analyzes the sentiment of different parts of the prompt rather than the entirety.
48	Text Summarization	Sentiment Analysis	Top-p p =0.8	Conversation: 'Caleb: How are you guys? Jennifer: very good, thanks Brooke: yes, it's very exciting here Caleb: where are you exactly? Jennifer: Now in New York! Caleb: how cool! Caleb: what have you seen so far? Jennifer: We've been to Connecticut and Massachusetts Jennifer: But NYC is the best Brooke: you forgot about Rhode Island Jennifer: right, such an important state! :P Brooke: ;) Caleb: you see, I knew you would like it Caleb: what do you like the most? Jennifer: diversity! Jennifer: something we don't have in Europe to that extend Jennifer: you're walking down a street and you hear 15 different languages Brooke: and everything is exaggerated Brooke: too big, greater than needed, it's quite fascinating Brooke: food, buildings, cars, everything Caleb: I'm glad you enjoy it girls! Brooke: :~" Output: Task 1: Summarize the conversation. Task 2: Is the conversation positive or negative?	Positive. Jennifer and Brooke are in New York. They like diversity in the city. They enjoy food, buildings, cars and everything. They enjoy the diversity in Europe. They dislike the city's borders. They like the city's buildings.	0.90	2386.15	0.26	1	1	1	0	0	Model does a good job of both analysis of the sentiment and summarization of the prompt.
49	Text Summarization	Sentiment Analysis	Top-p p =0.8	Conversation: 'Zed: Fanny, what happened? Fanny: Fuck. Fuck. Fuck. Zed: Tell me, please, I'm getting really worried. Fanny: Fuuuuuuuuuuuck Zed: Fanny, that's not saying anything. Fanny: I think I might have messed up the project. Zed: Shit. How bad is it? Fanny: At this point? It's criminal bad. I hope they only fire me. Zed: Calm down, I'm sure there's a way out. Fanny: I asked everyone. Even Brad said I'm screwed. Zed: Do you want me to call Michael? Fanny: Do you think it's a good idea? Zed: I don't know, can it get any worse? Worth a try, I guess? Fanny: Ok. Let me know.' Output: Task 1: Summarize the conversation. Task 2: Is the conversation positive or negative?	Negative. The conversation is positive. The speaker is optimistic. They think the situation can get worse. They advise Zed to call Michael. They don't believe it will get any worse. They think they'll find a way to solve the problem.	0.79	596.30	0.29	1	1	1	0	0	The summarization is accurate. The sentiment analysis is slightly ambiguous, but overall accurate.

SI No.	Primary Topic	Secondary Topic	Generation Type	Prompts	Responses	Likelihood	Perplexity	Confidence Score	Accomplished Task 1?	Accomplished Task 2?	Both Task Achieved	Both Tasks Failed	Single Task Achieved	Analysis
50	Text Summarization	Sentiment Analysis	Top-p p =0.8	Conversation: Brett: Hi! What games do u play? Andrew: U mean like video games? Brett: Yeah, obviously :) John: I like simulation games :) Andrew: Like the Sims? :) John: No! Like flight simulators, tank simulators and so on! Brett: What do u do there? John: Usually fly a plane or command a tank. Now there's this online game - World of Tanks. Know it? Andrew: Heard about it, but haven't played it. Brett: Me neither. John: U should, it's gr8! Output: Task 1: Summarize the conversation. Task 2: Is the conversation positive or negative?	Positive. - John and Brett are playing simulation games. - World of Tanks is an online game. - Andrew and John are not fans of simulation games. - John thinks the game is good. - Andrew and Brett haven't played it yet.	0.59	127.35	0.39	0	1	0	0	1	Although the model provides a subpar summary of the dialogue, the sentiment analysis is very accurate.
51	Text Generation	Text Summarization	Top-p p =0.8	Short Story: \"The world ended with a suddenness that no one had predicted. There was no warning, no time to prepare. It began with a flash of light, followed by a deafening explosion. Buildings crumbled, trees snapped, and the ground shook with fury. In the days that followed, there were fires and floods and a relentless, choking dust that filled the air. People tried to flee, but there was nowhere to go. Those who survived huddled in the ruins, scavenging for food and water, waiting for a rescue that never came. They were alone in a wasteland, surrounded by death and despair. And as they looked around at the devastation, they wondered if there was any hope for a future in this new, shattered world.\" In Generate a short conversation of 2 people discussing the summary of the given short story\n	M: It's been a long time since we heard about the earthquake. W: Yeah, it's been a while, wasn't it?M: Yeah, I think it was about 5,000 years ago W: That's really scary.M: It really was, wasn't it?W: Yeah, but it was an earthquake, and it was a deafening one, so we were all in shock and we didn't know what was going to happen.M: How long was it?W: About five hours. M: Then, what about the people who survived the earthquake? W: They scavenged for food and water, and waiting for a rescue that never came. They were alone in a wasteland, surrounded by death and despair.	0.93	474.57	0.37	1	1	1	0	0	The generated conversation perfectly reflects the main idea or topic of the given prompt. Although there are some missing information and some addition of new information by the model in the generated conversation.
52	Text Generation	Text Summarization	Top-p p =0.8	Prompt: \"Neural networks are a type of artificial intelligence that are modeled after the human brain. They consist of layers of interconnected nodes or neurons, which process information in a parallel, distributed manner. Neural networks are used for a variety of applications, including image and speech recognition, natural language processing, and predictive analytics. They can learn from data and improve their performance over time, a process known as training. Neural networks are particularly well-suited for tasks that involve complex, nonlinear relationships between inputs and outputs. There are many types of neural networks, including feedforward, recurrent, and convolutional networks, each with their own strengths and weaknesses. While neural networks have achieved impressive results in many domains, they can be computationally intensive and require large amounts of training data. As such, they may not always be the most practical or efficient solution for every problem. However, as the field of artificial intelligence continues to advance, neural networks are likely to play an increasingly important role in shaping the future of technology.\" In Given the above Prompt generate a short conversation of a student and teacher discussing the summary of the Prompt\n	Alicia: Hi, Professor. What's the summary of the project? Alicia: How are neural networks different from recurrent neural networks? Alicia: recurrent neural networks are very computationally intensive and require a lot of training data. Alicia: What do you mean by that? Alicia: I mean, how do you know that? Alicia: When you write a new problem, how do you make sure that you have enough data and training? Alicia: I think that the problem is very simple. Exactly, when you write a problem like this, how do you make sure that the data and training are in order? Alicia: The problem is that you need a lot of training data, and you also need a lot of training data. Alicia: What do you mean by that? Alicia: In order to write a good problem, you need to write something. And you have to know that a lot of training data is going to be necessary. Alicia: What is the best way to doPowerPoint presentation? Alicia: We can do it in three ways. The first is that we'll write an introduction to the topic, and then we'll write the body and the problem statement. We'll write the introduction in three parts. The second part is that we'll write the main topic and the introduction in a single paragraph. Alicia: That sounds like a good idea. What do you think about that? Alicia: Well, I think it sounds very theoretical. Alicia: What about the exercises and experiments? Alicia: I think that they are a lot of work. Alicia: Well, the exercises and experiments are very useful.	0.38	305.68	0.28	1	1	1	0	0	The model is able to generate a conversation between two particular characters/persons. The summarisation of the given prompt is also there in the conversation generated although there are some extra added information in the text.
53	Text Generation	Text Summarization	Top-p p =0.8	Prompt: \"Minneapolis is a vibrant city located in the heart of the Midwest. The city is known for its beautiful parks, lakes, and green spaces, which are enjoyed by residents and visitors alike. The city's downtown area is filled with modern skyscrapers, shopping centers, and a lively arts and cultural scene. Minneapolis is also home to a thriving music scene, with venues ranging from intimate jazz clubs to large stadiums that host major concerts. The city is known for its friendly and welcoming atmosphere, and its residents are proud of their community and its diversity. While Minneapolis has a reputation for its cold winters, its warm and welcoming spirit shines through year-round. Whether you're exploring the city's many museums and galleries, attending a sporting event, or simply strolling along the banks of the Mississippi River, there's always something new to discover in Minneapolis.\" In Given the above Prompt generate a short movie story based on description of Minneapolis from the Prompt\n	The film opens with a list of city statistics. It starts with the city population, which is a staggering 333,317. Then it shows the city's income, employment, and unemployment. It also shows the percentage of the city's population that is in poverty, or not working at all. The city's median income is \$49,560. The median income of a Minneapolis city resident is \$51,309. The average income for a city resident is \$27,810. Minneapolis is known for its parks, lakes, and green spaces. It also has a thriving music scene, with venues ranging from intimate jazz clubs to large stadiums that host major concerts. The city's residents are proud of their community and its diversity.	0.85	87.04	0.52	1	0	0	0	1	There are a lot of information that are added in the generated text. Also there are some information missig from the original prompt. Thus although it is able to generate the text based on the given task it almost fails to include the summary.
54	Text Generation	Text Summarization	Top-p p =0.8	Prompt: \"Investing is a crucial skill that can help you achieve financial stability and security. Whether you're looking to build wealth over the long term, save for a specific goal, or simply learn more about the world of finance, investing is an essential tool in your toolkit. However, many people find the world of investing overwhelming and confusing, with complex terms and concepts that can be difficult to understand. If you're looking to learn more about investing and how to get started, this book is here to help. By breaking down the basics of investing into simple, easy-to-understand language, we'll give you the knowledge and tools you need to make informed investment decisions and achieve your financial goals. Whether you're a complete beginner or an experienced investor looking to brush up on your skills, this book will be an invaluable resource for you. So, let's dive in and start learning about the world of investing!\" In Given the above Prompt generate a short conversation between a reader and a blind man, describing the given Prompt\n	What is the first step in investing? Why is it so important? I have never had any investment experience. It is important because it will help you to achieve your financial goals. The second step is gaining knowledge. In this book, I am going to teach you the basics of investing in simple, easy-to-understand language. The third step is making informed investment decisions.	0.98	63117.02	0.30	1	1	1	0	0	The text generation nad tsummarisation task works very well handled by the model for the given prompt

55	Text Generation	Text Summarization	Top-p p =0.8	Prompt: 'Aurora Borealis, also known as the Northern Lights, is a mesmerizing and awe-inspiring natural phenomenon that occurs in the polar regions of the northern hemisphere. It is caused by solar winds, which are streams of electrically charged particles that flow from the sun, colliding with the Earth's magnetic field and creating a spectacular display of colors and shapes in the night sky. The colors of Aurora Borealis are typically green, blue, pink, and purple, and they can take on a variety of shapes, including arcs, curtains, and spirals. The phenomenon is most visible during the winter months, when the skies are dark and clear, and can be seen in high-latitude regions such as Norway, Sweden, Finland, and Iceland. The experience of witnessing Aurora Borealis is truly unforgettable and is often described as a once-in-a-lifetime event. The beauty and wonder of this natural wonder are a testament to the incredible power and mystery of the universe.' Given the above Prompt generate a short conversation between 2 persons, describing the main event of the given Prompt	What does Aurora Borealis look like? Aurora Borealis is a natural phenomenon that occurs in the polar regions of the northern hemisphere. It is caused by solar winds, which are streams of electrically charged particles that flow from the sun, colliding with the Earth's magnetic field and creating a spectacular display of colors and shapes in the night sky.	0.88	8.20	0.46	0	1	0	0	1	Although the generated response seems like 2 persons describing the given event in the prompt but the generated text is not at all in the form of conversation. Thus although the text summarisation is successful, the task of text generation fails.
56	Text Generation	Text Summarization	Top-p p =0.8	Prompt: 'Movie Review: 'The Shawshank Redemption'. 'The Shawshank Redemption' is a timeless masterpiece that has earned its place as a classic in cinema history. Directed by Frank Darabont and featuring outstanding performances by Tim Robbins and Morgan Freeman, this film is a gripping tale of hope and friendship in the face of adversity. The story follows the journey of Andy Dufresne, a wrongly convicted inmate who maintains his dignity and resilience while serving a life sentence in Shawshank State Penitentiary. As Andy forms an unlikely bond with Red, played by Freeman, their friendship becomes the heart and soul of the film. The performances in 'The Shawshank Redemption' are remarkable, with Robbins and Freeman delivering exceptional portrayals of their characters. The chemistry between them is palpable, drawing viewers into their world and rooting for their success. The supporting cast is equally compelling, adding depth and authenticity to the story. The screenplay is poignant and thought-provoking, exploring themes of redemption, hope, and the indomitable human spirit. The film's direction is masterful, creating a perfect balance between moments of tension, drama, and emotion. The cinematography and musical score are also noteworthy, adding to the film's overall impact. 'The Shawshank Redemption' is a film that resonates long after the credits roll. It is a powerful story of resilience, friendship, and the enduring power of hope. If you haven't seen it yet, it is a must-watch film that will captivate you from start to finish.' Given the above Prompt generate a short story on the movie from the review given in the Prompt	The Shawshank Redemption is a timeless masterpiece that has earned its place as a classic in cinema history. 57	Text Generation	Text Summarization	Top-p p =0.8	Prompt: 'The interrogation scene between the Joker and Batman in 'The Dark Knight' is a pivotal moment in the film, showcasing the intense cat-and-mouse game between the two iconic characters. The scene takes place in an abandoned building, with the Joker captured by Batman as he seeks information about his plans to wreak havoc in Gotham City. Heath Ledger's portrayal of the Joker in this scene is nothing short of mesmerizing. Ledger's performance is chilling and captivating as he taunts and taunts Batman with his twisted sense of humor and unpredictable behavior. The Joker's maniacal laughter, his eerie demeanor, and his unsettling presence create an atmosphere of tension and unease. Christian Bale's performance as Batman is equally riveting. Clad in his iconic Batsuit, Bale portrays Batman as a determined and relentless vigilante, seeking answers from the Joker to stop his reign of terror. The contrast between the Joker's chaos and Batman's calculated approach creates a palpable sense of conflict in the scene. The dialogue between the two characters is sharp and intense, with the Joker taunting Batman with his twisted philosophy of chaos and unpredictability. Ledger's delivery of lines such as 'You have nothing, nothing to threaten me with. Nothing to do with all your strength' and 'I think you and I are destined to do this forever' is haunting and memorable, leaving a lasting impact on the audience. The scene is also visually striking, with the dark and gritty setting of the abandoned building adding to the tension and atmosphere. The use of lighting and shadows enhances the mood of the scene, emphasizing the psychological battle between the Joker and Batman. Overall, the interrogation scene in 'The Dark Knight' is a standout moment in the film, showcasing the incredible performances of Heath Ledger and Christian Bale, as well as the complex dynamic between the Joker and Batman. It is a pivotal moment that highlights the dark and psychological nature of the film, and remains one of the most memorable scenes in the history of superhero cinema.' Given the above Prompt generate a short movie review describing the summary of the given Prompt	with such a convincing performance that the audience feels it should never leave the theater without an emotional connection with the characters onscreen. The dark knight" is a masterpiece of action and the darkest of all superhero movies.	0.07	438.13	0.13	0	1	0	0	1	The model does not perform a well in generating either the movie review or even capturing the summary of the given prompt

61	Text Generation	Text Summarization	Top-p p =0.8	Prompt: 'When teaching a child about large language models, you can start by explaining that they are like smart robots that can understand and respond to written text. You can provide relatable examples of how they are used in everyday life, like virtual assistants or search engines. Emphasize their limitations, such as not having emotions or real-world experiences like humans. Discuss responsible use, including not using them for illegal or harmful purposes. Encourage critical thinking, verifying information from trusted sources, and protecting privacy. Supervise their usage and provide appropriate guidance on safe and responsible interactions with large language models or any other technology.' Given the above Prompt generate a short conversation between a teacher and a student describing the summary of the given Prompt	W: Thank you, Mr. White, for your presentation.M: I'm glad to learn something new.W: How do you think language models should be used in classrooms?M: Well, I think you should begin by explaining the basic function of large language models. For example, you could say, for example, that large language models can help people understand written text.W: But they also have a few shortcomings, such as they cannot be as emotional as humans and they don't have the same human-to-human communication as humans do.M: Well, can you give me a few examples of how large language models can help people understand their writing?W: Yes, they can be used in a variety of ways, such as search engines. For example, they can help people understand how to write a notepad or write a letter.M: What about their limits?W: They aren't as intelligent as humans, so they are not as good at understanding emotions or real-world experiences as humans.M: I don't see any limitations, besides that they are very user-friendly.W: So what can we do about them?M: I think they can help people learn and remember information better. I mean, how do you know if they understand you or not?W: Well, you have to know what you're doing. It's better if you're careful. If you are using them to get information for an illegal purpose, it's best to keep your hands off the device and just look for information from trusted sources.M: And if you want to learn something more complex, you should be able to explain it in a more detailed way.	0.94	491.15	0.34	1	1	1	0	0	Successful generation of a conversation between two people discussing what is emphasized in the prompt. Understands and generates a coherent conversation.
62	Text Generation	Text Summarization	Top-p p =0.8	Prompt: 'As the full moon hung ominously in the sky, casting eerie shadows over the dense forest, a group of friends set out on a camping trip. Excitement and anticipation filled the air as they ventured deeper into the wilderness, seeking adventure and escape from their mundane lives. However, as night fell and the temperature dropped, a sense of unease crept over them. Strange sounds echoed through the trees, and the forest seemed to come alive with unseen movements. Soon, they realized they were not alone. Something sinister lurked in the shadows, stalking them, and their idyllic camping trip quickly turned into a nightmare they could never have imagined. Little did they know that their worst fears were about to come true, and they would face a horror that would test their courage and sanity in ways they could never have anticipated.' Given the above Prompt generate a short story extending the given Prompt	In the summer of 2007, a group of friends were camping in the mountains of Idaho. They were all so excited to go camping and get away from it all for a while. As night fell, a sense of unease crept over them. Strange sounds echoed through the trees, and the forest seemed to come alive with unseen movements. Soon, they realized they were not alone. Something sinister lurked in the shadows, stalking them, and their idyllic camping trip quickly turned into a nightmare they could never have imagined.	0.41	154.07	0.59	1	1	1	0	0	Model understands summary of existing story given in prompt and continues the story in a way that makes sense logically and from a story telling perspective

64	Text Generation	Text Summarization	Top-p p =0.8	<p>Prompt: \'Friend 1: I can't believe we're finally in New York City for our summer trip! This place is incredible! Friend 2: I know, right?! The energy here is amazing. I've always dreamt of visiting the Big Apple, and now we're actually here! Friend 1: It's even more impressive than I imagined. The skyscrapers, the hustle and bustle, the diversity of people and cultures - it's all so captivating! Friend 2: Absolutely! And the food! I can't wait to try out some of the famous pizza and bagels here. I've heard they're unbeatable! Friend 1: Me too! I've been craving some authentic New York-style pizza since we arrived. Let's make sure to hit up a pizzeria and get the full experience. Friend 2: Definitely! Oh, and we have to visit Times Square at night. I've seen it in movies and TV shows so many times, but being there in person would be incredible. Friend 1: Agreed! Times Square is like a city that never sleeps. The lights, the billboards, the vibe - it's all so electrifying. I can't wait to take some selfies there! Friend 2: Oh, and we should also check out Central Park. I've heard it's a massive park right in the middle of the city, and there are so many things to see and do there. Friend 1: Yes! I've heard there are horse-drawn carriage rides, paddle boats, and even a zoo in Central Park. It's like a nature oasis in the heart of the concrete jungle. Friend 2: Exactly! I'm looking forward to some leisurely strolls, enjoying the greenery, and maybe even having a picnic. It'll be a nice break from the city's fast pace. Friend 1: For sure! And we can't forget about the iconic landmarks like the Statue of Liberty and the Empire State Building. They're must-visit spots for any tourist in New York City. Friend 2: Absolutely! I can't wait to take a ferry to see the Statue of Liberty up close and get panoramic views of the city from the top of the Empire State Building. It's going to be epic! Friend 1: Definitely! This trip is going to be a summer adventure to remember. I'm so glad we're experiencing it together, exploring the concrete jungle that is New York City! Friend 2: Me too! It's going to be a trip full of unforgettable memories, laughter, and new experiences. Let's make the most of every moment and have the best summer trip ever! Friend 1: Agreed! Here's to an amazing summer in the Big Apple. Cheers! Friend 2: Cheers! They clink their glasses and continue planning their itinerary, excited for all the adventures that await them in New York City.\'</p> <p>Given the above Prompt generate a short description of New York summarizing the given Prompt\n</p>	<p>They are finally in New York City for their summer trip. 67	Text Generation	Text Summarization	Top-p p =0.8	News Article: \Bitcoin, the world's most popular cryptocurrency, has been making headlines recently due to its skyrocketing value and increasing mainstream adoption. In the last few weeks, Bitcoin's price has been hitting new all-time highs, reaching over \$60,000 per coin. Many experts attribute this surge in Bitcoin's value to several factors, including the growing acceptance of cryptocurrencies by major financial institutions, increasing demand from individual investors, and the limited supply of Bitcoin available. Despite its popularity, Bitcoin and other cryptocurrencies have also been subject to criticism and regulatory scrutiny. Some critics argue that cryptocurrencies are too volatile and speculative, while others are concerned about their potential use in illegal activities such as money laundering and terrorism financing. However, proponents of Bitcoin argue that it offers a decentralized and secure alternative to traditional fiat currencies, with the potential to revolutionize the global financial system. As the debate over the future of cryptocurrencies continues, it is clear that Bitcoin and other digital assets are here to stay, with their impact on the world economy and financial system likely to be felt for many years to come. \n Generate a Headline for the above given news article\n	Bitcoin: An Upside to Cryptocurrency's Growth - Bloomberg. com/investors/investors/Bitcoin/investors_Story/?#50M3W3MX>	0.01	2041.35	0.06	0	0	0	1	0	Here the model generates a link along with the title which should not be the case. This might be because most of the Bitcoin information it has is from online posts.
68	Text Generation	Text Summarization	Top-p p =0.8	Short story: \It was the last day of school, and Sarah couldn't wait to start her summer break. She had been counting down the days for weeks, dreaming of long lazy days spent by the pool, picnics with friends, and trips to the beach. As soon as the final bell rang, Sarah rushed out of the classroom, her backpack bouncing on her back. She waved goodbye to her classmates and ran to meet her mom who was waiting for her outside. "Are you ready for an awesome summer, Sarah?" her mom asked, smiling. "I sure am!" Sarah replied, grinning from ear to ear. Over the next few days, Sarah and her family settled into their summer routine. They spent their mornings sleeping in, and their afternoons swimming in the pool or playing games in the backyard. Sometimes they would go for a bike ride or take a hike in the nearby mountains. One day, Sarah's best friend, Lily, came over for a sleepover. They stayed up late giggling and talking, and in the morning, they decided to have a picnic in the park. They packed sandwiches, fruit, and cookies and rode their bikes to the park. They found a shady spot under a big tree and spread out their picnic blanket. They ate and chatted and watched the clouds drift by overhead. Later that week, Sarah's family took a trip to the beach. They spent the day building sandcastles, swimming in the ocean, and soaking up the sun. Sarah collected seashells and made a necklace out of them, and her little brother caught a crab in a bucket. As the summer drew to a close, Sarah looked back on her summer break with a sense of contentment. She had made new memories, spent time with loved ones, and had a chance to relax and recharge before the start of a new school year. \n Generate a title for the above given short story\n	Summer Break: When School Ends, You Can't Wait for Summer! Daily Intelligence: Break: When School Ends, You Can't Wait for Summer!	0.40	264.10	0.08	0	0	0	1	0	The generated title "Summer Break: When School Ends, You Can't Wait for Summer!" captures the essence of the story and the excitement that comes with the end of the school year. It reflects on Sarah's anticipation of the fun-filled summer days, her adventures with family and friends, and the sense of contentment that she felt when the summer drew to a close. The title also suggests that summer break is an essential time for students to relax and recharge before the start of a new school year.
69	Text Generation	Text Summarization	Top-p p =0.8	Movie review: \I recently watched a movie that left me feeling deeply disappointed and dissatisfied. From the beginning, the plot was confusing and difficult to follow, leaving me feeling lost and disengaged. The characters were poorly developed and lacked depth, making it difficult to connect with any of them on an emotional level. The pacing of the movie was painfully slow, with scenes dragging on for what felt like an eternity. At times, I found myself checking my phone, desperately hoping that the movie would come to an end soon. The lack of action or meaningful dialogue made the experience feel like a complete waste of time. To make matters worse, the acting was wooden and uninspiring. The actors seemed to be going through the motions, lacking any real passion or investment in their roles. This made it difficult to believe in the world that the movie was trying to create, and left me feeling disconnected from the story. In the end, the movie failed to deliver any real emotional impact. The resolution was predictable and lackluster, leaving me feeling empty and unfulfilled. I would not recommend this movie to anyone looking for a compelling and engaging cinematic experience. It was a forgettable and disappointing film that left me with a negative sentiment. \n Generate a positive sentimental movie review summarizing the above given negative movie review\n	I think I just got a little too tired. The characters were poorly developed and lack depth, making the experience feel like a complete waste of time. The acting was wooden and uninspiring. The actors seemed to be going through the motions, lacking any real passion or investment in their roles. This made it difficult to believe in the world that the movie was trying to create, and left me feeling empty and unfulfilled. The resolution was predictable and lackluster, leaving me feeling empty and unfulfilled.	0.03	375.06	0.50	0	1	0	0	1	The generated output is not a positive sentimental movie review, but rather a repetition of the negative review in shortened form. The output does not reflect any positive sentiment or counterpoint to the negative review. Additionally, the output is incomplete and seems to have been generated erroneously.

70	Text Generation	Text Summarization	Top-p p =0.8	Short story:\n\nSophie had always dreamed of visiting Singapore, and when the opportunity finally arose, she jumped at the chance. As soon as she landed in the city-state, she was struck by the vibrant energy and stunning architecture. She spent her first day exploring the city, marveling at the towering skyscrapers and colorful neighborhoods. She tried local delicacies, like chili crab and laksa, and sipped on refreshing bubble tea as she wandered through the bustling streets. The next day, she visited the iconic Gardens by the Bay, where she strolled through the lush gardens and gazed up at the towering Supertrees. She even got to witness the nightly light show, where the trees came alive with music and a dazzling display of lights. On her third day, Sophie visited the historic Chinatown, where she explored traditional markets and temples. She learned about the rich cultural heritage of the Chinese community in Singapore and tried her hand at calligraphy, writing her name in beautiful characters. As the sun began to set, Sophie headed to the famous Marina Bay Sands hotel, where she took in the stunning views of the city skyline from the rooftop infinity pool. She felt like she was on top of the world as she watched the sun dip below the horizon and the lights of the city begin to twinkle. On her final day in Singapore, Sophie reflected on the amazing experiences she had during her visit. She felt grateful for the opportunity to explore this vibrant city-state and learn about its unique blend of cultures. As she boarded her flight back home, she knew that she would always hold a special place in her heart for the beautiful country of Singapore. \n\nGenerate a conversation summarizing the above given short story\n	M: When you were young, Singapore was the dream of your entire family. What a beautiful country!W: Yes, and when you were older, you loved it even more.M: I always wanted to go there. I never had the chance to.W: Well, a friend of mine suggested I go there one day, and when I arrived, it was the first day of my life.M: Really?W: Yes, and I was a bit nervous.M: I was, too. It was a great opportunity to explore this city-state and learn about its unique blend of cultures.W: Really?M: I knew I could go back and I didn't have to.W: But I had always wanted to visit. And when the opportunity came up, I was just ecstatic.M: How did you spend your first day in Singapore?W: It was fantastic! I had a great time!M: Where did you go?W: I visited Gardens by the Bay. I spent the next day walking through the gardens and looking up at the Supertrees. And then the next day I went to Chinatown.M: Did you enjoy the food there?W: I did lumieres.M: And did you see anything interesting?W: I did enjoy the calligraphy.M: How was the weather there?W: Rainy. It was perfect for swimming in the infinity pool at the Marina Bay Sands hotel.M: Did you have any trouble finding food?W: Not really. It was pretty easy to find.M: Did you have any problems at all?W: No, not really.	0.01	672.30	0.34	1	1	1	0	0	The generated conversation is not a coherent summary of the short story prompt. It includes some details from the story, such as the protagonist's desire to visit Singapore, her exploration of the city and its cultural landmarks, and her reflection on her experiences. However, the conversation also includes irrelevant details, like the weather and difficulty finding food, and lacks a clear structure or focus on the main narrative of the story. Overall, the output falls short in effectively summarizing the original text.
71	Text Generation	Text Summarization	top-p (p=0.8)	\n\n*Prompt: Humans have reached Jupiter\n\nFor the given prompt, Task 1: generate a fictional story\n\nTask 2: summerize the story in 2 sentences.*\n	Humans have reached Jupiter, but not yet found their way back to earth. They have found the moon Europa and are now called the Europeans. They have found that they are in danger of being wiped out by an alien race. They have arrived in the South American continent of South America, ruled by the Andes, and found that their only hope to survive is to travel to the continent of Australia. They have also discovered that they can fly.	0.62	42.19	0.33	1	0	0	0	1	Model might consider summerization as a subtask of generation and skips it
